Summary

I am a Ph.D. student in the Graduate School of Artificial Intelligence at UNIST. I am a member of the Visual Information Processing (VIP) Lab at UNIST under the supervision of Professor Jae-Young Sim. My research interests focus on Data-Centric Efficient AI, specifically including dataset distillation and data compression.

EDUCATION

Integrated M.S. and Ph.D UNIST, Korea

Mar. 2022 - Present

- Major: Artificial Intelligence
- Advisor: Jae-Young Sim
- GPA: 3.92/4.3

B.S. Ajou University, Korea

Mar. 2015 - Feb. 2022

- Major: Electrical Engineering
- GPA: 4.03/4.5 (Major GPA: 4.20/4.5)
- Military Service

Jul. 2016 – Apr. 2018

INTERNATIONAL CONFERENCES

(*: Equal Contribution)

[C3] Parameterization-Based Dataset Distillation of 3D Point Clouds through Learnable Shape Morphing *(1st author)*

Dong-wook Kim, Jae-Young Yim*, and Jae-Young Sim*

International Conference on Learning Representations (ICLR), 2026

[C2] Dataset Distillation of 3D Point Clouds via Distribution Matching *(1st author)*

Jae-Young Yim, Dong-wook Kim*, and Jae-Young Sim*

Advances in Neural Information Processing Systems (NeurIPS), 2025

[C1] Class-Aware Coresets Selection for 3D Point Clouds Classification *(1st author)*

Jae-Young Yim, Dong-wook Kim, and Jae-Young Sim

IEEE International Conference on Image Processing Workshop on Transparent Image Processing (ICIP Workshop), 2025

PREPRINT

[P1] Compression of Large-Scale 3D Point Clouds Based on Joint Optimization of Point Sampling and Feature Extraction *(1st author)*

Jae-Young Yim, and Jae-Young Sim

Preprint (arXiv), 2024

Domestic CONFERENCES

[D3] Integrating Dataset Distillation with Data Compression for 3D Point Clouds *(1st author)*

Jae-Young Yim, and Jae-Young Sim

Image Processing and Image Understanding (IPIU), 2026

[D2] Enhancing Quality of Gaussian Splatting in Few Shot Condition by Multi-Scale Augmentation

(2nd author)

Dong-wook Kim, Jae-Young Yim, and Jae-Young Sim

The Institute of Electronics and Information Engineers (IEIE), 2024

[D3] 3D Object Detection in Adverse Weather Conditions Using Positional Encoding

(1st author)

Jae-Young Yim, and Jae-Young Sim

Image Processing and Image Understanding (IPIU), 2023

PROJECTS

Development of Multi-modal Person Search Technology

Jun. 2024 - Present

- Funded by National Research Foundation of Korea (NRF)
- Investigating methods to maintain model performance and backward compatibility in dynamic environments.

Industrial Convergence Multi-modal Generative AI Talent Training Program

Jun. 2024 - Present

- Funded by Institute for Information Communication Technology Planning Evaluation (IITP)
- Conducted research on multi-modal generative models for industrial applications.

Deep Learning-based Glass Distortion Modeling and Image Restoration

Mar. 2022 – Feb. 2023

- Funded by National Research Foundation of Korea (NRF)
- Developed deep learning algorithms to restore images affected by glass distortion.

HONORS & AWARDS

Merit-based Scholarship (Academic Excellence), Ajou University

Fall 2021, Spring 2020, Fall 2019

ACADEMIC SERVICES

Reviewer

- AAAI Conference on Artificial Intelligence (AAAI): 2025

SKILLS AND INTERESTS

Research Interests: 3D Vision, Point Cloud Processing, Efficient AI, Dataset Distillation

Programming Language: Python, C

Frameworks & Libraries: Pytorch, OpenCV, Open3D

etc: Linux, Docker, MATLAB, AutoCAD
